

TECHNICAL CHARACTERISTICS OF PRODUCT

The characteristics of the product specified in this technical report meet the specification and test methods according to norm ASTM requirements.

PRODUCT SPECIFICATION

Reference	PIER 19,4x118,2
Product Code	8033385
Nominal Size (N)	19,4 cm x 118,2 cm
Work Size (W)	194,0 mm x 1182,0 mm
Thickness	11,0 mm
Water Absorption	Bla ($\leq 0,50\%$)
Shade Variation	V4
Application Joint	2,0 mm
Coverage Area	1,37 m ² /cx
Number of pieces per box	6
Usage Recommendation	LE

Check if the product is adequate for the planned installation area according to the room application table:

CODE	APPLICATION ROOM
LA	Residencial bathrooms.
LB	Residencial areas, bedrooms and kitchens with no access to the street and LA spaces.
LC	Commercial areas without access to the street, garages, porches and residencial areas with access to the street, and LB and LA spaces.
LD	Commercial areas with access to the street and LA, LB, and LA spaces.
LE	Sidewalks and outside flat areas and LD, LC, LB and LA spaces.
LP	Pools.
LF	Facades.

PHYSICAL PROPERTIES

Breaking strength (lbf)	≥ 250
Water Absorption (%)	$\leq 0,5$
Visible abrasion Resistance	2

ANTISLIP CLASSIFICATIONS

Angle: Oil: 24°
Dry: 25°
Classification: R11

Test method according to norm DIN 51130 (R)

PENDULUM FRICTION TEST

Average (USRV): 50
Classification: 3

Test method according to norm UNE-ENV 12633:2003.

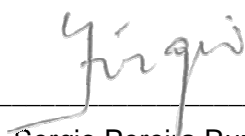

CHEMICAL PROPERTIES

Chemical Resistance Class A
Stain Resistance Class B

Attention:

- Sand may produce scratches on any type of surface covering (stone, wood, vinyl or ceramic tiles). Therefore, ceramic tiles are not warranted against scratches, especially concerning glossy surface products.
- Special care is recommended during the application and its use
- In residential areas, we recommend to protect the base of furniture and appliances.
- Product manufactured by the wet process.
- Product with Class I combustibility, according to NBR 15575.
